RE: Underground Injection Control (UIC) Permit Application R06-LA-0026
Class VI Pre-Construction Permit Application
Administrative Review of Application

Dear Mr. Chartrand:

United States Environmental Protection Agency Region 6 (EPA) has received the River Parish Sequestration, LLC, UIC Class VI permit application via the Geologic Sequestration Data Tool (GSDT) for a new injection well (RPN-3-INJ) in Assumption Parish, LA. EPA has reviewed the permit application pursuant to 40 CFR §124.3(c) and has determined that it contains the information required by the regulations to be deemed administratively complete. Please note that administrative completeness only confirms the submission of required elements; it does not imply or confirm the presence of adequate technical content required for permitting.

EPA will now begin its technical review to evaluate the application's technical content. During this phase, EPA may request additional information and clarification of previously submitted information.

If you have any questions about this letter, please contact Brandon Maples at maples.brandon@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Ken Johnson", followed by the word "for" in a smaller, cursive script.

Ken Johnson, PE
Ground Water / UIC Section Chief
